O-CE1-0SXXYY-X-E-X-5.000 MHz
Precision Ultra Low Phase Noise OCXO in 36x27 mm
“Europack”

Product Data Sheet

Features

- SC-cut crystal
- High Stability
- Low Aging
- Ultra Low Phase Noise
 Extraordinary (E) -93 dBc/Hz at 0.1 Hz
 -128 dBc/Hz at 1 Hz
 -152 dBc/Hz at 10 Hz
 -175 dBc/Hz on the floor
- Sine Wave output +14 dBm TYP

Applications

- Instrumentation
- GPS
- Telecommunication Systems
- Radar
- COTS/Dual use

H code	Height, inches (mm) TYP
5	0.5 (12.7 mm)
6	0.63 (16 mm)
7	0.75 (19 mm)
1	1.0 (25.4 mm)

Notes:

- 1*. Longer storage time, especially at low temperatures, may affect both retrace and setability parameters. It may require few days on power for re-stabilization.
- 2*. All parameters, unless otherwise specified, are guaranteed over specified temperature and Vcc range. The tests of phase noise and short-term stability, however, are performed at room temperature in benign and static environment only.
- 3*. It is highly recommended, if possible, to avoid tuning the calibration externally in order to avoid deteriorating the phase noise and short-term stability performance. If necessary, metal film low noise resistors with bias from Vref port must be used.
- 4*. If No Vc option is selected, pin #1 is not connected. Initial calibration in this case will be ± 50 ppb MAX, ± 25 ppb TYP as shipped.
- 5*. Frequency jumps $< 300E-12$ (1 s gate time on the counter) guaranteed, not tested.

Environmental and Mechanical

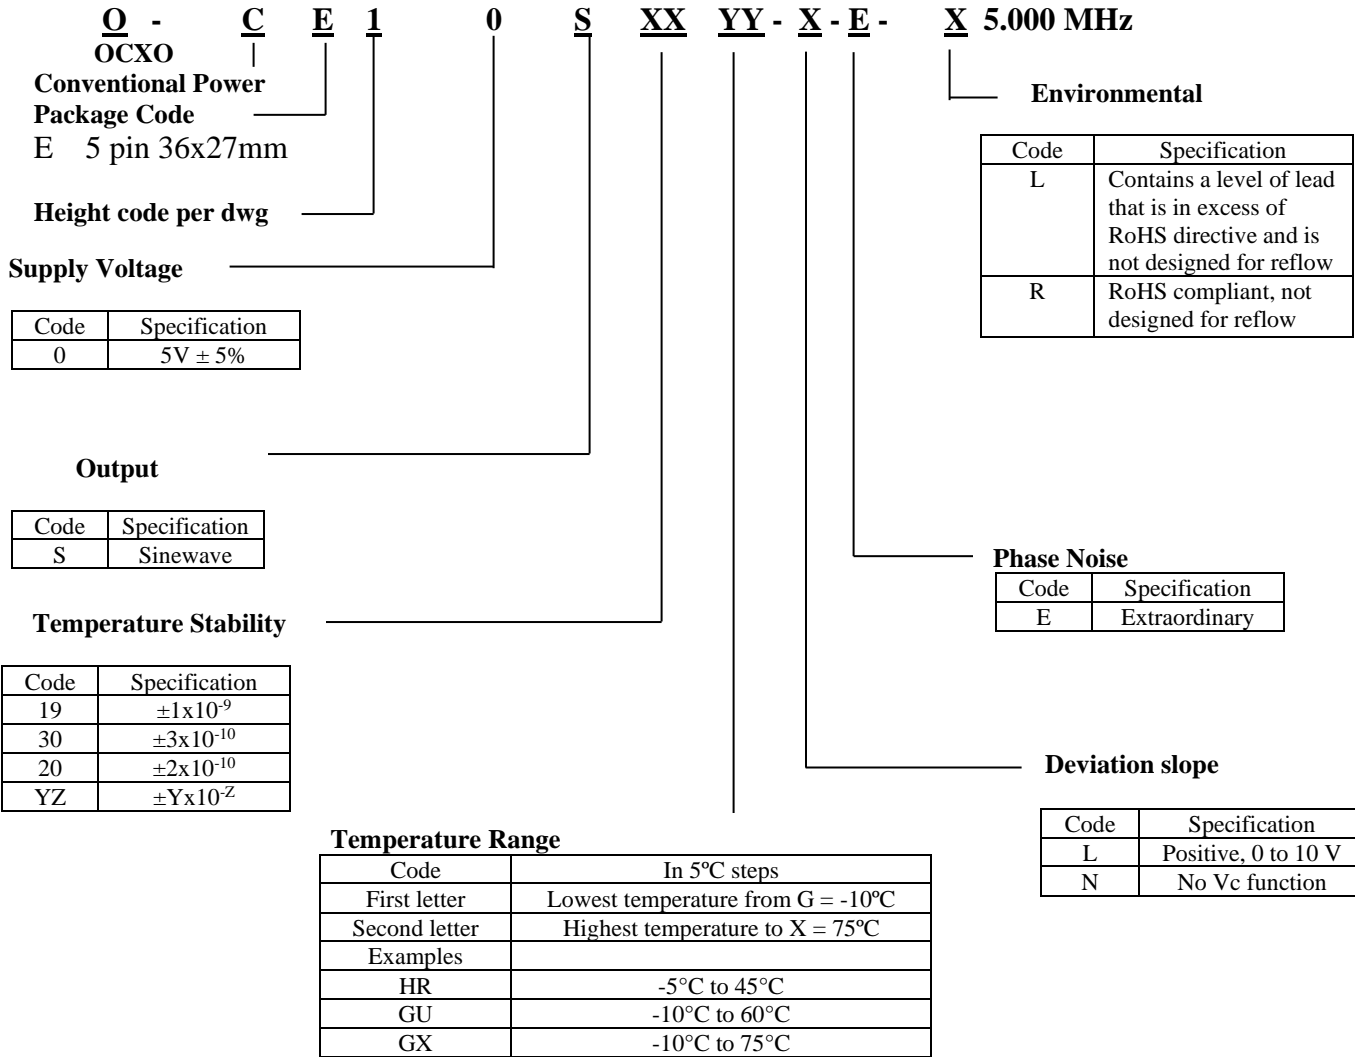

Operating temp. range	0°C to 70°C Standard, Other options – see chart below
Storage Temperature	-50°C to 90°C
Mechanical Shock	Per MIL-STD-202, 30G, 11ms
Vibration	Per MIL-STD-202, 5G to 2000 Hz
Soldering Conditions	260°C for 10s Max leads only

Electrical Connections
